The accompanying notes are an integral part of these consolidated financial statements.

1. NATURE OF OPERATIONS AND GOING CONCERN

RPX Gold Inc. (the "Company" or "RPX Gold", formerly Red Pine Exploration Inc.) was founded in 1936 under the laws of Ontario, Canada for the acquisition, exploration, and development of mining properties. The Company's head office and primary location of its registered records is 372 Bay Street, Suite 1702, Toronto, Ontario, M5H 2W9. The Company is currently in the exploration stage and has not commenced any commercial operations.

The accompanying Condensed Interim Consolidated Financial Statements for the three and nine months ended April 30, 2026 and 2025 (the "Financial Statements") have been prepared on the basis of a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business.

As at April 30, 2026, the Company had cash of \$2,790,756 (July 31, 2025: \$9,427,734) and an accumulated deficit of \$130,038,232 (July 31, 2025: \$123,202,281) and for the three and nine months ended April 30, 2026 had net cash used in operating activities of \$2,385,622 and \$6,818,450 respectively (three and nine months ended April 30, 2025: \$2,973,750 and \$6,916,218). Cash decreased in the nine months ended April 30, 2026 primarily due to expenditures incurred on exploration activities and general corporate purposes.

In assessing whether the going concern assumption is appropriate, management considers all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. The Company's ability to continue operations and fund its mining interest expenditures is dependent on management's ability to secure additional financing. Management is actively pursuing such additional sources of financing, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. The Company is currently in the exploration stage and has not identified economically recoverable minerals. These conditions indicate that a material uncertainty exists that may cast significant doubt about the Company's ability to continue as a going concern.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of operations of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, unregistered prior agreements, unregistered claims, indigenous claims, and non-compliance with regulatory, environmental and social licensing requirements. The Company's assets may also be subject to increases in taxes and royalties and renegotiation of contracts.

These Condensed Interim Consolidated Financial Statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and consolidated statement of financial position classifications that may be necessary were the going concern assumption inappropriate, and these adjustments could be material.

2. BASIS OF PREPARATION

(a) Statement of Compliance

These Condensed Interim Consolidated Financial Statements have been prepared in accordance with IAS 34, Interim Financial Reporting using accounting policies consistent with IFRS[®] Accounting Standards as issued by the International Accounting Standards Board ("IASB") and IFRIC[®] Interpretations of the IFRS Interpretations Committee. They do not include all information required for annual Financial Statements

2. BASIS OF PREPARATION (continued)

(a) Statement of Compliance (continued)

and should be read in conjunction with the Consolidated Financial Statements of the Company as at and for the year ended July 31, 2025. Selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes to the Company's financial position and performance since the last audited annual consolidated financial statements.

The Financial Statements were approved by the Board of Directors on June 17, 2026.

(b) Basis of Measurement

These Financial Statements have been prepared on a historical cost basis, using the accrual basis of accounting, except for certain financial instruments that have been measured at fair value at the end of each reporting period as explained in the accounting policies.

(c) Basis of Consolidation

These Financial Statements include the accounts of the Company and its wholly owned subsidiaries, Augustine Ventures Inc. and Wawa GP Inc. All intercompany balances and transactions have been eliminated in full on consolidation. On August 1, 2025, the Company entered into a vertical amalgamation, whereby all of its wholly owned subsidiaries were amalgamated with the parent company.

(d) Critical Accounting Estimates and Judgments

The preparation of financial statements in conformity with IFRS requires that management make judgements, estimates and assumptions about future events that affect the amounts reported in the financial statements and related notes to the financial statements. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities, profits and expenses. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The effect of a change in an accounting estimate is recognized prospectively by including it in income in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

Interim results are not necessarily indicative of the results expected for the financial year. Actual annual results may differ from interim estimates. The accounting policies, including significant judgements made by management applied in the preparation of the Condensed Interim Consolidated Financial Statements, are consistent with those applied and disclosed in the Company's audited consolidated financial statements for the year ended July 31, 2025.

2. BASIS OF PREPARATION (continued)

(d) Critical Accounting Estimates and Judgments (continued)

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could have an effect on the amounts recognized in the Financial Statements relate to the following:

Going Concern

The preparation of the Financial Statements requires management to make judgments regarding the going concern of the Company (Note 1).

Share-based payment transactions:

The Company measures the cost of equity-settled transactions with employees and applicable nonemployees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, risk-free interest rates, volatility and dividend yield and making assumptions about them. Expected volatility is generally based on the historical volatility of the Company. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in Note 10.

Deferred Taxes

The estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful discovery, extraction, development and commercialization of mineral reserves. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and deferred tax provisions or recoveries could be affected.

3. CAPITAL MANAGEMENT

The Company defines capital management as the manner in which it manages its shareholders' equity. As at April 30, 2026, the Company's shareholders' equity was \$2,188,933 (July 31, 2025 - \$8,484,921). There were no changes in the Company's approach to capital management during the nine months ended April 30, 2026 and the Company is not subject to any externally imposed capital requirements.

The Company's objective in managing capital is to maintain the entity's ability to continue as a going concern, support the Company's normal operating requirements and to continue the exploration and evaluation of its mineral properties. The Board of Directors does not establish a quantitative return on capital criteria for management but rather relies on the expertise of the Company's management to sustain future development of the business.

Notes to Condensed Interim Consolidated Financial Statements

For the three and six months ended April 30, 2026 and 2025

(Unaudited, expressed in Canadian Dollars)

3. CAPITAL MANAGEMENT (continued)

The Company regularly monitors and reviews the amount of capital in proportion to risk and future development and exploration opportunities. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new debt or equity or similar instruments to obtain additional financing.

As at April 30, 2026, the Company had a working capital surplus of \$1,739,455 (July 31, 2025: \$8,049,613) and for the three and nine months ended April 30, 2026, used net cash in operating activities of \$2,385,622 and \$6,818,450, respectively (April 30, 2025: \$2,973,750 and \$6,916,218, respectively). Working capital is a non-GAAP measure calculated as total current assets less total current liabilities.

8. MINERAL PROPERTIES (continued)

Cayenne Property

The Cayenne property consists of 4 cell claims covering 70 ha and 1 lease covering 63 ha (total 133 ha) in Genoa Township located approximately 110 km southwest of Timmins, Ontario. The Company owns 100% of the property.

Fern Elizabeth Property

The Company had a 100% interest in 22 cell claims covering 407 ha located approximately 10 km northwest of Atikokan, Ontario. The Company allowed its interest in the Fern Elizabeth Property to lapse, as of January 22, 2026, as it was not considered a core property to its business.

Net Smelter Royalties (“NSR”)

Wawa Gold Project

As part of the 100% consolidation of the Wawa Gold Project, the Company’s previous joint venture partner retained a 2.0% NSR on production from the Wawa Gold project, of which 1.5% of the 2% NSR is subject to a buyback for a total cost of \$1,750,000.

On August 29, 2023, the Company entered into a net smelter return royalty agreement (the “Royalty Agreement”) with Franco-Nevada Corporation (“Franco-Nevada”) for the sale of a 1.5% net smelter return royalty (the “Royalty”) on its Wawa Gold Project (“Wawa”). Pursuant to the Royalty Agreement, Franco-Nevada has been granted a one-time option, exercisable within 30 business days of RPX Gold providing notice to Franco-Nevada confirming both (i) a board-approved construction decision at Wawa, and (ii) completion of a feasibility study at Wawa, to purchase an additional 0.5% net smelter return royalty (the “Additional Royalty”) at a cost of 1.0x the net present value of the Additional Royalty, which is to be calculated based on the value of the mineral reserves within the Wawa feasibility study, after applying a 5% discount rate, and utilizing the then-prevailing analyst consensus commodity price forecasts.
